Course Overview

The **Advanced Clinical Ayurveda Course** is a comprehensive, structured online programme designed for Ayurveda graduates, practitioners, and serious learners who wish to deepen their clinical understanding and practical application of classical Ayurvedic principles.

The course integrates **Shastra-based knowledge with modern clinical insights**, focusing on diagnosis, treatment planning, Panchakarma, pharmacology, and disease-wise management.

Conducted by experienced faculty, the programme emphasizes **case-based learning, assignments, and interactive Q&A sessions**, enabling participants to confidently apply Ayurveda in real-world clinical practice.

Target Group

- BAMS / MD (Ayurveda) graduates
- Ayurveda practitioners
- Final-year Ayurveda students with basic clinical exposure
- International Ayurveda learners with foundational knowledge

Key Highlights

- 350+ hours of live training
- Strong focus on clinical applicability
- Experienced faculty with practical insights
- Assignments and interactive learning
- Suitable for international Ayurveda learners
